ELEVENTH ANNUAL MEETING - SEPTEMBER 1989

Canada/EEC Proposal for Changes to NAFO Conservation and Enforcement
Measures Regarding Incidental Catch Limits

Part I.A.4 A Contracting Party shall limit its incidental catch to a maximum of 2,500 kg or 10%, whichever is the greater, for each species listed in Schedule 1 for which no quota has been allocated in that subdivision to that Contracting Party.

However in cases where a ban on fishing is in force, incidental catches of the species concerned may not exceed 1,250 kg or 5%, whichever is the greater.

The percentages above are calculated as the percentage, by weight, for each species of the total catch retained on board.
